# Chemical Resource

What is ChemicalReSource?

- ChemicalReSource is a tool geared specifically to chemists.
- This tool allows chemists to search for commercially available products by drawing structures and sub-structures.
- Additional parameters can be included to refine search results including molecular weight and molecular formula.
- The ChemDraw plug-in is required to use the ChemicalReSource tool. The plug-in is accessible from the ChemicalReSource interface.

Using ChemicalReSource

1. Click on the *Home* tab, then the *Shop* tab to bring up the *Shop Hosted Catalogs* search tool.
2. Select the c*hemicals* link:

   Browse: suppliers | categories | chemicals

3. The ChemicalReSource tool is opened in a new browser window.
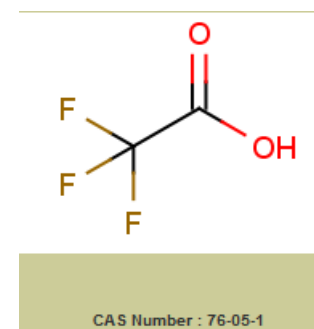

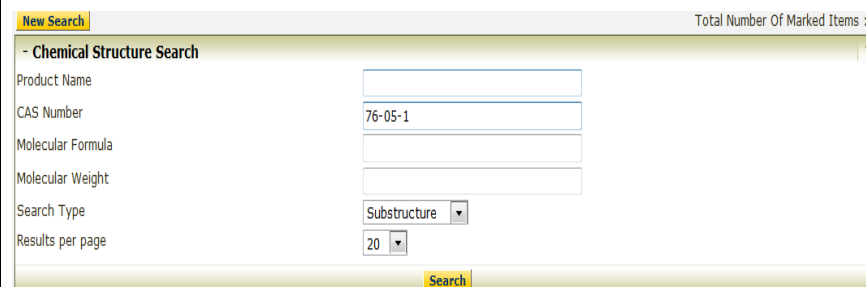

4. If the plug-in has not been loaded, only textual searches can be performed, e.g., CAS#, molecular weight, molecular formula, etc.
5. If the plug-in is not loaded, a message appears on the screen to load it. Select the link if structure searching is desired.
6. Follow on-screen directions to load the plug-in. This will likely take several minutes to download.
7. Enter any combination of parameters and click **Search**.
8. Once a compound of interest is identified, select the **Search Catalog** button to see which products are available in the hosted catalogs.

For example, say you are searching for Trifluoracetic acid:
You can enter singly or in combination

- Product Name
- CAS Registry #
- Molecular Formula
- Molecular Weight Range

You can also draw the structure using the functions on the Toolbar.

Once a compound of interest is identified, select the **Search Catalog** button to see what products are available in the hosted catalog.

Trifluoroacetic Acid, Biochemical Grade - 25 ml from Spectrum Chemicals & Laboratory Products
Part Number	T2552-25ML	**71.44** USD
Manufacturer Info	T2552-25ML - (Spectrum Chemical)	25mL, EA
CAS Number	76-05-1	1 Add to Cart ▼
